

# **BWF** premium**LIGHT**

*pure light experience*

Zebras belong to nature ...

... rather than on walls. A pleasant lighting atmosphere through a low glare and high transmission rate at the same time are the requirements of your customers.

The applied light-directing solutions in order to meet these requirements, however can lead to a so called „zebra (stripe) effect“. **BWF premiumLIGHT** eliminates this effect.

In addition, **BWF premiumLIGHT** has been optimized for applications in PMMA material and will be adjusted to your individual conditions in order to achieve the best results.
